

JASKO ENTERPRISES, INC.

Driver Privacy & Identity Verification Policy

Broker and Customer Notification

To Our Valued Customers, Brokers, and Business Partners:

JASKO Enterprises, Inc. is committed to protecting the privacy, security, and personal information of our employees and independent contractors while maintaining the highest level of cargo security and fraud prevention.

Recently, our dispatch department has received increasing requests requiring drivers to provide personal photographs (selfies), submit copies of personal identification beyond what is legally required, share personal contact information, or install and use third-party applications that collect personal device data.

While we fully support legitimate shipment verification and anti-fraud procedures, JASKO has adopted the following policy.

JASKO WILL PROVIDE

- Company truck photographs displaying JASKO branding and USDOT information when reasonably requested.
- Tractor and trailer numbers.
- Driver first and last name when operationally necessary.
- Vehicle registration information when contractually required.
- GPS tracking through approved freight visibility platforms when required by the load agreement.
- Location updates from dispatch.
- ETA updates.
- Proof of pickup and delivery documentation.
- Any information required by applicable law or the transportation contract.

JASKO WILL NOT PROVIDE

- Driver selfies or facial photographs.
- Photographs of personal driver's licenses sent by text message or email unless legally required.
- Personal cell phone numbers when company contact information is sufficient.
- Installation of applications on a driver's personal phone that collect unnecessary personal information.
- Continuous tracking of a driver's personal mobile device outside approved transportation visibility platforms.
- Personal biometric information.

- Personal email addresses.
- Personal social media accounts.
- Any information unrelated to the transportation of the shipment.

Privacy and Data Security

Many third-party applications collect and retain user information, including location history, device identifiers, contacts, and other personal data. Unless JASKO has reviewed and approved the application's security and privacy practices, drivers are instructed not to install such applications solely to satisfy shipment requirements.

If a broker or customer requires the use of a specific platform, JASKO reserves the right to review that platform before authorizing its use.

Fraud Prevention

JASKO understands the increasing concern regarding freight fraud and cargo theft. We are committed to cooperating with reasonable verification procedures that protect all parties while respecting employee privacy and cybersecurity best practices.

Our dispatch department is available to verify:

- Driver identity
- Equipment assignment
- Tractor and trailer numbers
- Current shipment status
- Load authorization
